

# Master Turbo

## TOOLING

### DESCRIPTION

Tool for easy, fast and perfect grooving. Delivered with 2 blades (4mm)

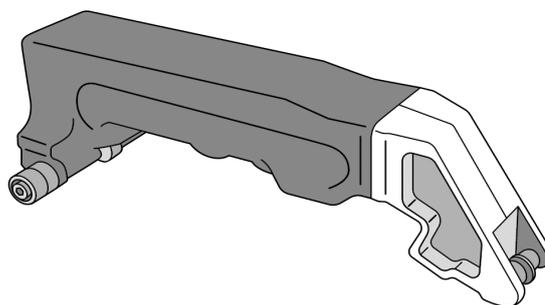

#### Key Features

- Consistent depth of grooving regardless the pressure applied
- Optimal groove shape for strong welding
- Allow grooving in circles and other shapes
- Guiding wheel for straight seams

#### Compatible floor and wall covering

- Heterogenous PVC flooring
- Homogenous PVC flooring
- Wallcovering : Aquarelle, Protectwall, iQ Surface wall, Wallgard

#### Main Segment of Application

### TECHNICAL INFORMATION

#### Product

Unit Weight (kg)	1,16
------------------	------

#### Packaging

Pieces per box	1 roll (25m)
----------------	--------------

### INSTALLATION

Setup the depth of grooving by releasing the screw locking the blade, position the blade up or down and tight the screw when the position is correct.

Place the groover over the joint, with front and back guiding wheels in the seam. Press and push the groover. Use the back blade to finish wall area.

### CLEANING AND MAINTENANCE

- In case of residual stuffing, open the clearing cap and remove the residual elements with your fingers
